

# A CHECKLIST

## REVENUE CYCLE MANAGEMENT SOLUTIONS CHECKLIST

**How does your Revenue Cycle Management tool compare?**

**Instructions:** Check the box for each feature currently in use at your institution. If unsure, leave blank.

1	<input type="checkbox"/> Configurable Case Prioritization
2	<input type="checkbox"/> Automated Case Escalation
3	<input type="checkbox"/> Analytics — embedded business intelligence tools like <i>nSight</i>
4	<input type="checkbox"/> NLP/CAC results for all use cases – CDI, Coding and Population Health
5	<input type="checkbox"/> One-click references — powered by an on-demand Encoder Solution
6	<input type="checkbox"/> Longitudinal co-morbidities capture and analysis – ideal for HCC management
7	<input type="checkbox"/> nCode — Powered by an embedded clinical terminology service
8	<input type="checkbox"/> Advanced Querying tools using your templates, your workflows, not those of the vendor
9	<input type="checkbox"/> Notes and Tips — interdepartmental transparency and communication tools
10	<input type="checkbox"/> Automated DRG Reconciliation workflows
11	<input type="checkbox"/> HCC identification and omission, plus longitudinal regression with RAF calculation
12	<input type="checkbox"/> Code Compare — easily compare documents from different authors

### Calculating your score:

Each checked box is worth 1 point. Enter your total points here \_\_\_\_\_.

Point Value	Results
10 – 12 Points	Your system has most of the important features and functions
7 – 9 Points	Your system is about 65% effective but missing important features
4 – 6 Points	Your system is only 40% effective and is missing important features
3 Points and Below	Your system needs to be replaced

### Terms Used:

- NLP Natural Language Processing
- CAC Computer Assisted Coding
- DRG Diagnosis Related Groups
- HCC Hierarchical Condition Categories
- RAF Risk Adjustment Factors

## INTEGRATED REVENUE INTEGRITY SYSTEM (IR1S) Simplification, Automation, Reliability, Lower Cost... get them all with IR1S.

Our Integrated Revenue Integrity System (IR1S) eliminates the need to license and integrate disparate tools, with endless integration points, competing priorities, and increased complexity. Cloud based, easy to implement, intuitive to use, with flexible On-Demand module activation. We guarantee a 30-day implementation from final data integrity check to operational capability that requires nominal IT support from your organization.

### Extensive integrated modules enable solutions for:

- Clinical Documentation Improvement
- Quality & Population Health including our BPCI solution
- Charge Capture & Audit

“

### CUSTOMER TESTIMONIAL

“RecordsOne played an integral part for us to achieve financial success in our new bundle payment program. Last year, we started a bundle payment program with Medicare. Being a large organization, we faced a challenge early on with our data sets. RecordsOne was the ideal partner to ensure our success as they demonstrated knowledge about the program, and a willingness to create and customize tools for us to succeed. The value of their partnership was recognized early on as we needed specific data in real time from two different EMR systems. This data was needed to generate a report that could be run daily and identify patients who would be participating in the bundle program. Lisa and the RecordsOne support team took it upon themselves to create an analytical tool that we never had before.

This tool further generates a report that is easily run and shared with team members that identifies patients who are participating in the bundle payment program. By having this report, our Care Team is able to meet with participating patients prior to discharge and better manage their care after they have left the hospital. This thorough and easy to use solution made what was once a large barrier to our success into one of our greatest strengths in the bundle payment program. Thanks to RecordsOne, we are 100% compliant with the Medicare standards and have seen great success in the first year of implementation; including substantial financial gains and savings.”

– S. Darrington, ACO Senior Fellow, CommonSpirit Health, Nebraska Market

## COMPUTER ASSISTED PROVIDER AUDIT

**Simplification, Accuracy, Configurability, Lower Cost...  
get them all with CAPA.**

Computer Assisted Provider Audit (CAPA) is a singular system for auditing claims – increasing efficiency by integrating numerous requisite tools into a simple, easy to use web interface and improving effectiveness by prioritizing claims to be audited based on our partners criteria and enhanced via our nSight analytics engine.

**Eliminate the swivel chair effect by including:**

- Integrated codebooks and references
- Automated grouping and DRG calculations
- Integrated audit worksheets
- Configurable, comprehensive workflows
